

EliZea

Water shortage and Water stress? Secure your investments with EliZea

EliZea is an innovative biosolution powered by phytosterols, natural molecules that, when applied preventively, strengthen the plant's resilience to water stress.

By activating the plant's own resistance pathways, EliZea helps preserve growth and grain formation during critical dry periods. The result: better water use efficiency, reduced stress impact, and higher yield potential maintained through to harvest.

Savings
Reduces water requirements

Resilience
Single application with a lasting effect

Performance
Enhances your yields

Enhances root growth, allowing better access to soil water resources

Boosts canopy vitality

Optimizes water use to support active growth

Improves grain fill & weight

90%
Win rate*

Yield
+524
kg/ha*

Water use efficiency
increased by
20%

Long-lasting effects and proven results

✦ Effects of EliZea observed up to harvest

1 Partial stomatal closure for less evapotranspiration

2 Root development

3 Stay green effect

4 Increased spike size & TKW

* Positive yield gain in 9 out of 10 trials

** Average yield gain across 347 trials from 2019 to 2024 worldwide.

- ▶ Product Category: Plant biostimulant
- ▶ Contains: Phytosterols
- ▶ Formulation: SE
- ▶ Type of application: foliar spray
- ▶ Excellent safety profile
- ▶ Packaging: 5L, 20L

Key Considerations & Best Practices

- ▶ Use on well-drained soils in summer
- ▶ Adhere to the application protocol including dosage and growth stage

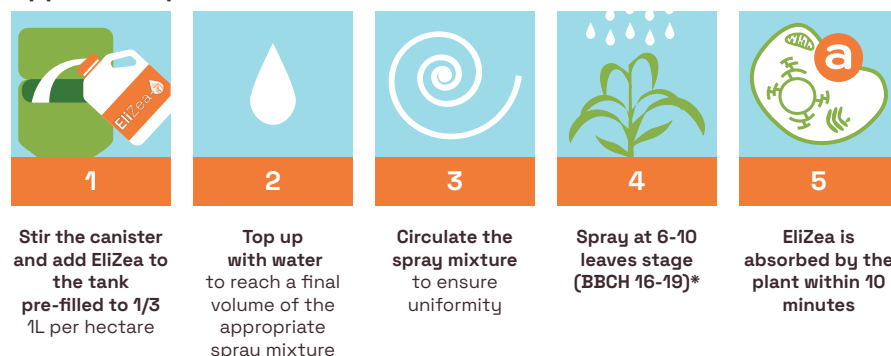

EliZea is designed for application on healthy plants, without deficiencies in nitrogen, phosphorus, or other essential elements.

A single preventive application

Application protocol

Recommended conditions of use

Crop	Dosage (L/ha)	Number of applications per year	Application stage
Maize	1	1	6 - 10 leaves BBCH stage 16-19

Precautions

- ▶ Can be tank-mixed with fungicides, insecticides and certain herbicides. For further information regarding compatibility concerns, please consult with your technical advisor.
- ▶ Application should be made in growing conditions: no wind, humidity higher than 60%, temperature between 5°C and 25°C..

*Adhere to a 2-hour rain-free period.

ELICIT PLANT - 1 passage de la Croix - Le Châtaignier
16220 MOULINS-SUR-TARDOIRE - France

EliZea® : Liquid Suspo-emulsion (SE) containing phytosterols. Produced by: Elicit Plant SAS - Authorized crops and uses: maize. EliZea® is a non-microbial plant biostimulant (PFC 6.B) aiming to increase yields under drought stress conditions. Maximum dose: 1L/ha. Maximum number of applications: 1/year (growth stages BBCH 16-19). CE DE.3091

Classification : Product not classified according to Regulation (EC) No 1272/2008.

Safety instructions: P101: If medical advice is needed, have product container or label at hand. P102: Keep out of reach of children. P262: Avoid contact with eyes, skin or clothing. P270: Do not eat, drink or smoke while using this product. P280: Wear protective gloves/protective clothing/eye protection/face protection. P273: Avoid release to the environment. P501: Dispose of contents/container in accordance with local regulations.
