

Boost Soybean Resilience and Maximize Yields

EliZon Plus improves water use efficiency by helping soybean crops retain moisture and maintain performance under water stress. With a single foliar application at the recommended pre flowering stage, EliZon Plus helps preserve plant health and support higher yields throughout the season.

EliZon Plus In Action

- Supports higher overall yield potential
- Promotes stronger root development
- Improves leaf area and overall plant vigor
- Enhances plant water management under stress conditions
- Helps maintain plant health

Easy Application

- Apply once between V3-R1 stages
- Use rate: 14 fl.oz/acre
- Compatible with most fungicides, herbicides, and insecticides for tank mixing
- Rainfast within 2 hours
- Available in 2.5-gallon containers
- Easily integrates into with existing agronomic programs
